Work Experience

Senior Software Engineer — **New Relic** — **Hyderabad, India** — May 2026 - present

- Promoted to Senior Software Engineer for technical leadership and reliability engineering; continuing to own the Secrets Store platform with expanding architecture scope.

Software Engineer 2 — **New Relic** — **Hyderabad, India** — August 2024 - May 2026

- Built and owned the Secrets Store platform (three-layered encryption, AWS KMS, 30K RPM, high availability/low latency), exposing an internal REST API and a customer-facing GraphQL API with a 99.99% SLA.
- Designed a Signing and Verification platform from scratch: key generation/rotation APIs, JWKS distribution via AWS S3 and Cloudflare CDN, and audit logging, with >90% test coverage; infra (DB, S3, KMS, alerts) provisioned via Terraform.
- Maintained 100% on-call availability and zero Sev 1-3 incidents across 197 merged PRs (82.8% merge rate); resolved a recurring connection-pool-exhaustion incident.
- Performed 200+ code reviews (∼45% of the team's total pull requests), mentoring engineers on code quality, architecture, and observability.

Associate Team Lead — **Cognam** — **Delhi, India** — June 2023 - July 2024

- Led design and development of a blockchain-based backend driving over $1 billion in monthly revenue for a leading international payment processor.
- Managed a 6-member back-end team — sprint planning, task allocation, and stakeholder management in an agile/scrum setup.

Software Engineer — **Cognam** — **Delhi, India** — June 2021 - May 2023

- Delivered 30+ scalable APIs for a bank's enterprise mobile app: registration, login, profile updates, money transfers, and notifications.
- Built a block-reader system syncing a database with blockchain at up to 100,000 transactions/sec, adding decentralized capability to traditional banking systems.
- Automated ML-powered KYC on the Issuer Server, cutting manual work by 95%.

Skills

Languages	Java, C/C++, JavaScript, Python, SQL, Solidity
Frameworks	Spring, J2EE, Spring boot, Hibernate, JUnit, Unit Testing, jQuery, ReactJs, JPA
Technologies & Tools	MySQL, MongoDB, Postgres, Kafka, Git, AWS, Terraform, Docker, Linux, RESTful APIs, GraphQL
Some More Skills	GCP, Microservices, Backend, Full-stack, Design patterns, API Design, System Design, Distributed Systems, High Availability, CI/CD, SRE, AI Tools, Bash

Projects

- **Quiz Application:** Developed a full-stack quiz app with Java and PostgreSQL backend for daily facts and news. Link to Website
- **Clustering on Gene Expression Dataset:** Built 4 clustering techniques from scratch on a cancer gene dataset in Python. Link to GitHub
- **Terrace Farming Robot:** Designed and built a bronze medal-winning robot for stair climbing and farming in hilly areas. Link to GitHub

Education

2017 - 2021 — B.Tech at **Indian Institute of Technology(IIT), Patna** — (GPA: 8.04/10.0)
Relevant Coursework: Computer science, Databases, Data Structures, ML, Algorithms, operating systems

Awards & Achievements

- Won Bronze Medal amongst 23 IITs in DIC's Terrace Farming Challenge for hilly areas in Inter IIT Tech Meet.
- Secured 2nd position in Stage-1 and overall 16th in National Level Robocon contest and 99/100 in Stage-1 in Robocon.
- Ranked top 0.68% in JEE Main 2017 and top 5.35% in JEE Advanced 2017; open source contributor to web3j (Java).
